WHEEL COVERS COLLECTION

Ratkapne su izrađene od čistog ABS materijala, otporne na habanje i hemijske rastvore.

Farba na samim ratkapnama je zaštićena lakom tako da se ne može lako izgrebati.

Držači ratkapne su od posebnog materijala koji je skoro nelomljiv tako da pri montiranju ne može da se ošteti ili slomi.

Žica koja služi kao opruga je od Patentiranog opružnog čelika tako da nepostoji mogućnost spadanja ratkapne sa točka automobila.

U mogućnosti smo da izradimo sve modele ratkapni sa logom vaše firme, kompanije, brenda...

Wheel covers are made of pure ABS material, resistant to abrasion and chemical solutions.

The paint on wheel covers is protected by varnish so that it can not be easily scratched.

Holders of wheel covers are of special material that is nearly unbreakable so that the mounting can't be damaged or broken.

The wire which serves as a spring from a patented spring steel so that there is no possibility of wheel covers fall off the wheel of the car.
